

## **CON Level II Notice**

Traditionally, the course schedules for the next fiscal year (FY) are published and open for registration on May 1<sup>st</sup>. The new Level II Contracting courses, a mix of distance learning (DL) and classroom courses are scheduled to be fully deployed in FY 07, however, they are not currently open for registration. The reason for this is that the DL courses, CON 214, CON 216, and CON 217, are prerequisites for the classroom courses, CON 215, and CON 218.

The DL courses are scheduled to be deployed in the 4<sup>th</sup> quarter of FY 06. Once the prerequisite DL course is deployed it along with the follow-on classroom course will appear on the FY 07 schedule and will be open for registration. For example:

When CON 214 is deployed, students will be able to register for CON 214 and then CON 215.

When CON 216 and CON 217 are deployed, students will be able to register for CON 216, CON 217, and then CON 218.

There will be a transition matrix for students who have completed one or two of the existing Level II courses, CON 202, CON 204, or CON 210, but will need to complete their core certification training using the new curriculum. The matrix will identify which of the new courses will be required to take to complete the core training requirements. This change does not impact the requirement for 2 electives.
